

EURO-AMERICAN
— WORLDWIDE LOGISTICS —

3PL Services for
the Life Sciences

ABOUT US

Euro-American Worldwide Logistics is a collaborative affiliate of the life sciences sector of Massachusetts, helping the industry to achieve critical mass in the region by providing assistance with international trade compliance, shipping services, and product storage necessary for sustainable success of the pharmaceutical, biotech, medical device and bio-manufacturing industries.

Our third-party logistics center consists of highly trusted professionals specializing in Global Trade Compliance, cGMP Storage, and International Logistics. We are a licensed U.S. Customs Brokerage providing expert guidance on importing into the U.S.; a certified freight forwarder to manage international logistics; and an asset-based cGMP storage facility for storing finished goods, raw materials, and critical supplies.

For new products preparing to enter the market, Euro-American offers niche, white-glove service packages custom tailored for the life sciences to seamlessly progress from pre-clinical to product launch. Packages include assigning a personalized team of professionals to assist with Global Trade Compliance, International Logistics, temperature-controlled transportation, and cGMP storage, to ensure the entire international supply chain remains in compliance with U.S. Federal regulatory agencies to guide your products to market without delays.

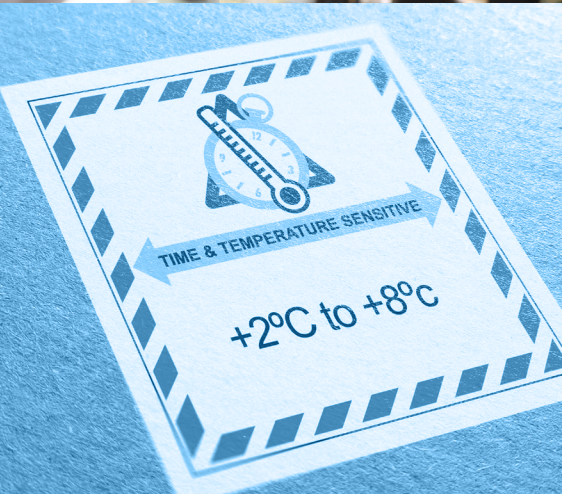

We are conveniently located in Central Massachusetts adjacent to the Worcester Airport, just 40 miles west of Boston. Our 45,000 square foot, temperature controlled, and ISO-9001 certified facility, was intentionally designed to provide cGMP storage for FDA regulated products to ensure a secure environment for products requiring regulatory oversight and sensitive care.

Our security measures are CTPAT certified by the US Government, including 24/7 monitoring and video feeds. We offer flexible inventory control solutions; you are guaranteed accurate, up-to-the-minute information via immediate alerts. We make it convenient for you to track products and adjust shipping schedules throughout the supply chain.

OUR COMMITMENT TO SERVICE

- GxP compliant transportation and/or storage of pharmaceuticals, medical devices, and other regulated products
- Strictest adherence to industry guidelines to ensure your products remain fit for intended use throughout the international supply chain
- Expertise spanning the full spectrum of ambient and cold-chain logistics in the life sciences
- Well established team of licensed professionals in life sciences supply chains
- 50+ years of guiding products to market through GxP-compliant shipping lanes

WHAT YOU CAN EXPECT

- White glove service providing you with continuous direct access to a team of senior level experts
- Full range of logistics services for strategy, consulting, compliance, and global supply chains
- Reliable licensed professionals overseeing shipping activity, including product launches, when it matters most
- Each of our clients receive a dedicated three-person team assigned to them for continuous communication and trustworthy advice with critical decisions
- Extensive supervision to ensure product efficacy throughout foreign and domestic import/export shipments

SECURITY AND CERTIFICATIONS

We are ISO-9001 certified to ensure a GxP-compliant internal quality management system, mirroring the FDA regulatory processes applied throughout the life sciences industry.

We are CTPAT certified by the U.S. Department of Homeland Security, meeting strict requirements for the highest levels of security. By adhering to stringent logistics guidelines throughout the entire supply chain, we ensure the safety, integrity, and quality assurance of every product under our care.

“ The team at Euro-American did a phenomenal job! Thank you for your expert guidance and a successful launch that exceeded expectations. ”

– VP of Supply Chain, Biopharma Company

At Euro-American, we believe that by providing clients direct access to an expert staff with a comprehensive understanding of GxP processes, we can enhance both quality and convenience throughout the supply chain. We are dedicated to providing clients an asset-based solution, so you have the direct control and oversight necessary for quality assurance within the life sciences.

If your life science-focused organization is seeking a dependable logistics partner, reach out to Euro-American today
